Our Queen Set of Prize-Winning CHRYSANTHEMUMS.

None Better. None Cheaper. Look Carefully Over the List.

PRICE, 10c. EACH, OR THIS WONDERFUL SET OF 15 SORTS, POSTPAID, \$1.00.

Abraham Lincoln.—Rich cream color. The petals are trumpet-shaped, with elkshorn tips, and are arranged to form a perfect ball. One of the largest among Chrysanthemums. Totally distinct, and of the grandest build. A sensational variety. Won twelve first prizes.

Inter-Ocean.—It is an ivory-white, very massive in build, recurving, and petals interlacing. This variety was cut twelve days before the Chicago show and reached there in fine condition, being awarded a special Columbian medal. Our friends can depend upon its being the very finest and most distinct white Chrysanthemum of the year. Winner of ten first prizes.

Golden Wedding.—The grandest yellow ever offered. This fine variety swept everything before it at the New York and Philadelphia shows. In color it is deep, bright gold of shining texture, is very large in size, the petals are both long and broad, and channeled lengthwise. A perfect Japanese incurved of most beautiful form, very free in growth. A first-class exhibition variety.

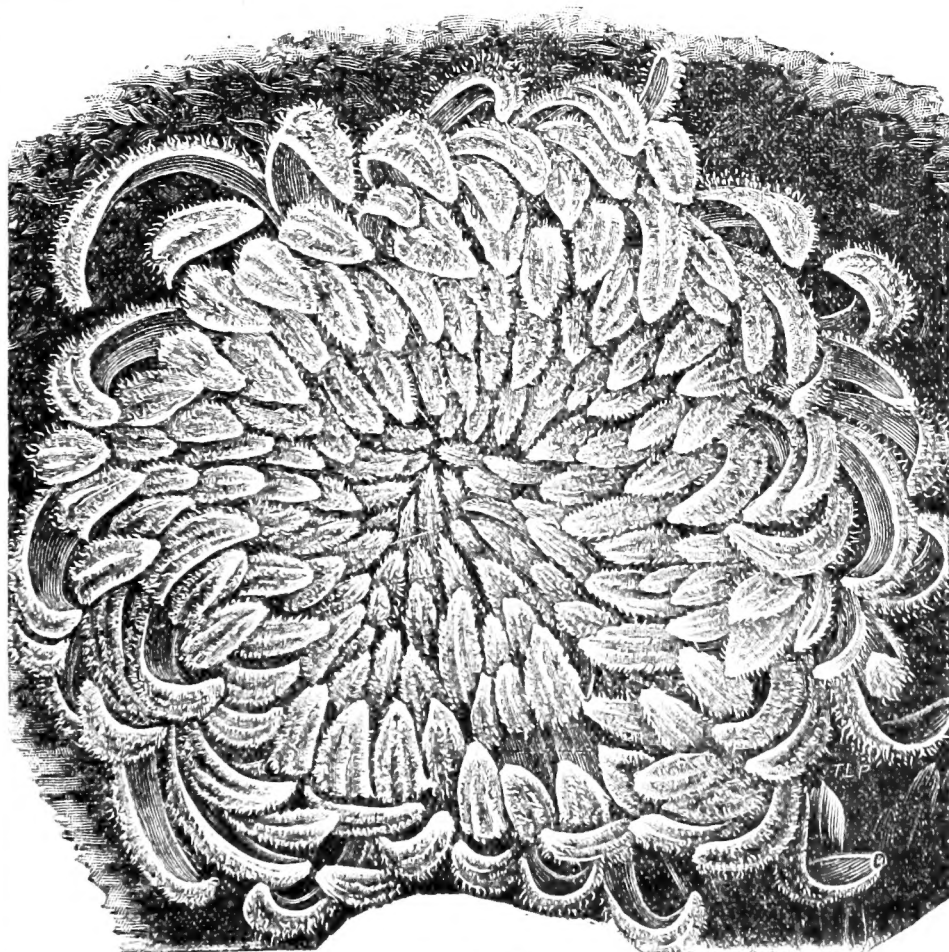

Maude Dean.—An immense pink variety, finely incurved, petals broadly shell-shaped. One of the largest flowers exhibited in the Fair shows. Almost a pure self-pink. Received silver medal at Philadelphia, and awarded certificates of merit at New York and Philadelphia.

Fair Maid of Perth.—A magnificent heavy bloom of largest size, borne on stiff, erect stems, similar in form to Mary Wheeler, but much more double, as upper petals incurve to center, while under ones reflex closely to stem, forming a round ball of purest white, occasionally tipped rose. One of the varieties winning the Astor cup at Madison Square Garden.

Wm. Falconer.—The finest of the Ostrich Plume type. Its color is an exquisite shade of silvery pink, with deep rose on the inside of the petals; is of vigorous constitution, being one of the strongest growing varieties we have, so that it is certain to produce perfect flowers under the most ordinary cultivation.

Mrs. E. G. Hill.—This beautiful variety is one of the very earliest to bloom, which makes it decidedly meritorious. It is of vigorous growth and fine form, the blooms are eight to ten inches in diameter the color is a delicate lavender pink, petals incurved. The display of this variety at the World's Fair attracted all passers-by, and was admired greatly. It was the winner of twelve first prizes.

Pitcher & Manda.—This is the most wonderful Chrysanthemum ever introduced. There is nothing that has ever been offered that in any way approaches it. Who ever heard of Chrysanthemums having two distinct colors in one flower? But that is just what Pitcher & Manda is. The outer five or six rows of petals are pure white, and of Dahlia-like form, while the center is a bright, deep yellow, the two

colors being sharply defined. One of the most distinct novelties of the year. Won fifteen prizes.

Beau Ideal is a bright rose-pink, without touch of lavender shadings. The form is a somewhat flat, incurved shape, the outer petals horizontal, showing the bright pink, the incurving center showing a lighter shade. We know of no variety that will compare with it in purity and brightness of tone. It is very free blooming and of the largest size. Captured eight first prizes.

Dr. Covert.—Bright golden-yellow, perfectly double, nicely incurving, of great substance, lasting well when cut, stem quite stiff, a good grower, producing more than the average number of large perfect flowers to the plant. Winner of several first prizes.

Lillian E. Bird.—A beauty in every respect. Of the very largest size, long, tubular petals, of perfect form, producing flowers which are twelve inches in diameter. The color is an exquisite shade of "shrimp pink," the flower when fully open being an immense half-globe. A magnificent variety.

Eda Prass.—Fine, recurving, globular, bloom of great substance and depth; opening delicate salmon, changing to a creamy-white. Certificated.

Queen Set of Prize-Winning Chrysanthemums Continued.

Mrs. Lewis Childs Maderia.—A perfect compact globe of golden-yellow, petals upright, of heavy texture, and like unopened quills, of strong constitution, stems stiff and flowers large. Both color and form

are absolutely perfect. This variety will always be retained in your memory when once seen. Received silver medal at Philadelphia, certificate at Indianapolis, and numerous first prizes.

The Queen.—A grand double white, of fine size and grand substance. Very rounded in form, incurving and full. Probably the best white in cultivation. Won prizes wherever shown.

George W. Childs.—No Chrysanthemum created such a sensation as did this. The flowers are of massive size, reflexed, with broad, stiff petals, color deep, rich, velvety-crimson, with no shade of brown or chestnut. Flowers borne on strong, stiff stems. The foliage resembles Cullingfordii, but it is much heavier and darker. They grow close up to the flowers, which gives the plant an elegant appearance. It is a fine, strong, clean grower. It captured the first prize at Chicago for best red. It was awarded the J. R. Pitcher, Esq., gold medal at Orange, N. J., for the best seedling; the silver medal by the Pennsylvania Horticultural Society; the medal of excellence, American Institute; certificate of merit at Indianapolis. It was exhibited at Indianapolis last year over eight inches in diameter. No Chrysanthemum can compare with it for color, size of flower and growth.

ACHILLEA, THE PEARL. The Great Cemetery Plant.

We take much pleasure in calling special attention to this new plant, as it is one of the most beautiful and useful. It is a hardy perennial, the top dying down to the ground every Winter. A plant will produce hundreds, and even thousands, of flowers the first Summer, but when established the second year they frequently have more than five thousand perfect flowers on a plant at the same time. It commences to bloom early in July, is a perfect mass of beautiful flowers till frost, the same bloom keeping perfect two or three months. Its flowers are pure white, perfectly double, and produced in large sprays, making it one of the finest cut flowers for bouquets, vases, baskets, etc., or for any kind of decorations. For cemetery planting it is the most valuable of all flowers, as it is sure to thrive and bear its great profusion of snow-white flowers nearly the whole Summer for years and years. The plants we supply will have abundance of roots, with but little top. They will all grow rapidly, and produce abundance of bloom this Summer. They can either be potted or planted in the open ground as soon as received. 15c. each; four for 50c.

ACHILLEA, THE PEARL.

Double Iris Kaempferi.

The newer varieties of this King of Iris, recently introduced from Japan, are marvels of beauty and stateliness. Think of a plant sending up to the height of three feet a dozen flower spikes, each spike bearing from two to four enormous blossoms eight or ten inches across and of the most delicate and beautiful colors, markings and combinations. Think of a bed of all colors, white, indigo, violet, lavender, mauve, sky-blue, royal purple, blush, yellow, et . . .

Your imagination can conceive of nothing grander, and when you see them you will realize that they are infinitely more grand and beautiful than your imagination could portray. Such are these new Double Iris Kaempferi, the king of hardy perennial plants. Once planted in your garden they are a joy for a life-time without further care, blooming profusely in June and July, during which time they are the greatest attraction your garden or lawn can contain.

Price, 25 Cents Each; the Set of Five for \$1.00.

Blue Danube.—Deep indigo, violet shadings, yellow center.

Gold Bound.—Pure white; one of the best.

Mr. Fell.—Grayish-white, distinctly veined celestial blue, with blue and yellow center.

Mahogany.—Dark red, shaded maroon.

Templeton.—Light violet, shaded and mottled with redfish-pink and white.

HIBISCUS.

Hibiscus Schizopetalus.—A curiously formed flower pendant, the petals in a whorl, orange-red, totally unlike any other Hibiscus, or indeed any other flower; the petals are open like lace work. Not only a great curiosity, but highly ornamental. 15 cents each.

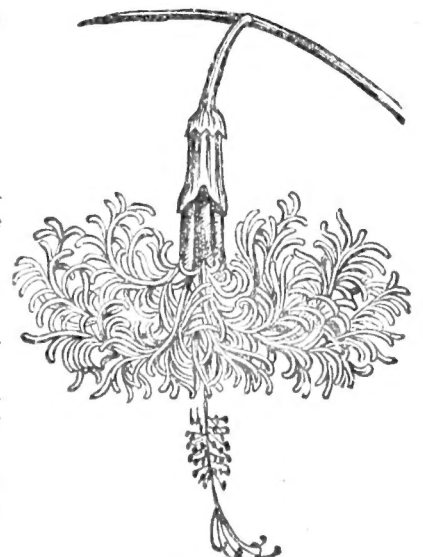

Three Fine Sorts.

Double Crimson.—This grand variety has immense flowers of the richest crimson. Combined with glossy foliage renders it best of all.

Senator Evans.—A beautiful Hibiscus. The shape of its flower is identical with the Auriantica, and has the same purple markings at base of petals. The color of this variety, instead of being orange, is a bright lemon color.

Sub Violaceous.—Flowers of enormous size, of a beautiful carmine, tinted with violet, probably the largest flower of the Hibiscus family, and an unusually free-bloomer. We take great pleasure in recommending this fine plant.

The three above fine sorts, 10 cents each; or the three for 25 cents.

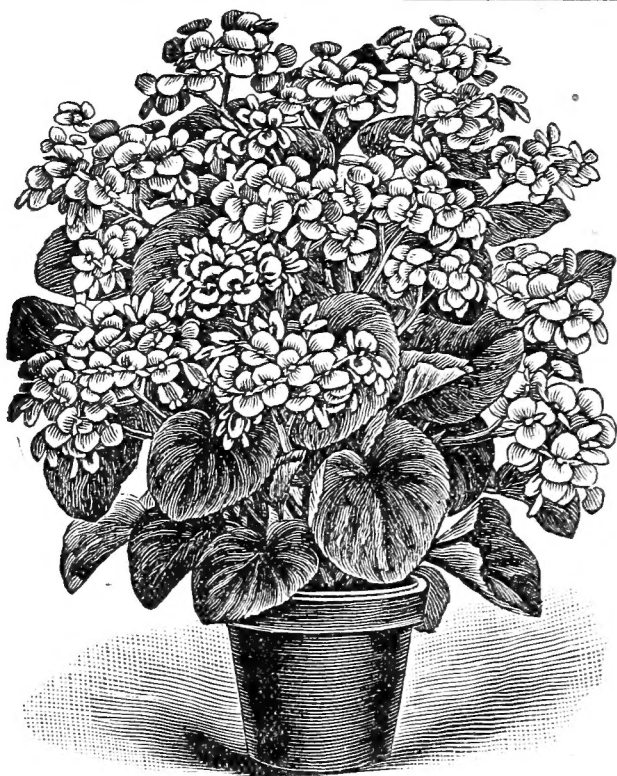

HIBISCUS SCHIZOPETALUS

Our "SATISFACTION" Collection of Flowering Begonias.

Easy to Flower, Exquisite in Coloring and Sure to Please All Who Try Them.

PRICE, 10 CENTS EACH, OR THE SET OF FIFTEEN CHOICE SORTS FOR \$1.00.

PERPETUAL FLOWERING BEGONIA, DEWDROP.

New Begonia, Dewdrop.—In the new Begonia Dewdrop we have the best flowering Begonia ever obtained. Its graceful flowers are produced in profusion all during the Summer and Winter. It is a dwarf, compact-growing variety, the foliage is a bright, glossy-green, with shell-shaped leaves and stems of light crimson. The blooms are produced in clusters of from six to eight florets, which are satiny-white, with golden-yellow stamens. When placed out in the sun during the Summer, the color changes to a delicate shade of pink, with crimson stems, making a beautiful contrast. Unlike other Begonias. It is a profuse bloomer. Eighty-seven clusters of flowers have been counted on a single plant.

New Begonia, Thurstonii.—This elegant new Begonia is without a rival as to combinations of both foliage and flowers. The underside of leaves is a rich purplish red, the veinings very prominent, while the face or upper side is a bronzy green, shaded with crimson and olive, with a peculiar glossy metallic luster over all. Flowers rosy-white, in large clusters, well above the foliage. The plant has a fine habit. Taken altogether, we think this the best all-round Begonia we grow.

Begonia, Bruanti.—The leaves are so glossy they appear to have been triple-varnished, shrubby, bearing sprays of delicate blossoms covering the whole plant.

Bertha de Chateaurocher.—Next to Dewdrop this is the freest flowering Begonia we have. It blooms the year around, makes a handsome window plant with its beautiful foliage and bright, currant-red flowers.

Incarnata.—Vigorous grower, long leaves, flowers a beautiful pink, edged with salmon. Charming variety.

McBethii.—Of the Weltoniensis type, with very deeply indented leaves, which are fine and small. Shrubby in growth and very free flowering, being constant the year round. A fine Summer bedding plant, if given a light soil and perfect shade. Put it among your ferns. White flowers, waxy in texture, carried in panicles.

Zebrina.—An erect growing variety, with a beautiful profusion of pendant leaves. Besides its graceful form the leaf is distinguished by its glistening, silvery shading following the leaf, the body being a very dark, velvety-green; underside plum color, vein green. Flower pure white. A beautiful variety.

Wettsteteni.—This is very similar in foliage, growth, color and flower to Rubra. The panicles of bloom are the largest of any Begonia. A new variety and very beautiful.

Fuchsoides Coccinea.—Elegant, free-blooming variety. It resembles *Hybrida Multiflora* in growth. The flowers are bright scarlet.

Lobata Variegata.—The leaves are smooth, long, pointed and prettily blotched. The body of the leaf is a dark green, studded with bright silvery spots. The plant is covered with handsome rosy-white flowers. This makes a splendid house Begonia, being of quick growth and having both handsome flowers and foliage makes it very desirable.

Argentea Guttata.—It has purple-bronze leaves, oblong in shape, with silvery-markings, and is in every way a most beautiful Begonia. It produces white flowers in large bunches. It is splendid for house culture.

Alba Perfecta Grandiflora.—Here we have a Begonia that has never been appreciated like it should be, as it is really elegant, and we doubt if there is a white-flowered variety that equals it. The foliage resembles Rubra in shape, but is a lighter green, while the flower panicles are much handsomer. It is a pure white flowering Begonia of much merit. Try it.

Alba Picta. It is shrubby in habit and compact in form, having long, slender, lance-shaped leaves on short stems, thickly studded with silvery-white, the spots graduating in size from the center towards the margin.

Rubra.—If you can have only one Begonia let it be a Rubra, for it will prove a constant delight. It is so fast growing that it will in a year or two reach the top of your window, sending up heavy, stiff canes an inch in diameter, and rising beside them will grow strong, slender branches, gracefully drooping under heavy waxy leaves and pendant panicles of coral colored flowers as large as a hand. Medium-sized plants are frequently seen with more than twenty such panicles at a time. Among the individual flowers you will find three distinct forms growing side by side. One of the most wonderful plants within our knowledge.

Marguerite.—Leaves a bronzy-green, somewhat resembling *Metallica*, but growing in more bushy form and easier to handle when grown for market. Large trusses of light, rose-colored flowers freely produced.

BEGONIA MARGUERITE.

REX BEGONIAS.

Countess Louise Erdody.—The curious, snail-shell Begonia, a pretty leaf with pinkish metallic luster, covered with plush-like hairs. 30 cents each.

THREE CHOICE SORTS.

Lesoudsii.—This is the finest and largest leaved of any of the Rex family. It is impossible to describe in words the beautiful markings of this magnificent Begonia. It is a cross between Begonia Diadema and a Rex variety, but retains in a marked degree the Rex character. We consider this the finest of all the Rex family, both in size of leaf and rich coloring.

Annie Dorner.—One of the finest of these hybrids. A nice, free, bushy grower, very elegant notched leaves, deeply pointed. The coloring is very rich, the dark center and edge being velvety in texture, enclosing a silky, pointed zone, showing the crossings of the red veins.

Louise Closson.—Louis Chretien made a decided sensation among Begonia growers a few years ago. Then came Lucy Closson, an improvement in the same line, and now we have Louise Closson, the brightest colored Rex yet introduced. The zone of rosy heliotrope and bright red is broad and very highly colored, the habit and freedom of growth exceptionally good, while the metallic luster is very enchanting. Begonia lovers looking for a first-class novelty to add to their collections will find this variety extra fine in every particular.

20c each; or these three choice sorts for 50 cts.

THE BEST SINGLE GERANIUMS

Ever Offered by any Firm. The List Embraces the Very Best Bedders, Sun Proof, and Equally as Fine for Pot Culture.

Souvenir de Mirande.—The greatest novelty in new Geraniums that has appeared for a number of years is undoubtedly Souvenir de Mirande. It is entirely distinct from any other variety known, and is quite different from the usual marked varieties that have from time to time made their appearance. It has round florets, upper petals cream-white, with a distinct rosy pink border, lower petals salmon rose, streaked pure lilac. A most novel color. It is extremely free-flowering, and produces fine trusses of its magnificent blooms. Mr. John Thorpe says it has made a leap of a decade in its advent.

Blanche Moulas.—A grand bedding variety of much merit. The flowers are large salmon, beautifully bordered with white. A Geranium of rare beauty.

Lansdowne.—A soft, deep scarlet, floret large and round, and formed into large trusses, borne with the greatest freedom. An ideal bedder, producing a mass of soft, brilliant color, well above the foliage, which is a light, bright green.

Marguerite de Layres.—A grand single white, plants a mass of white bloom, trusses of the grandest size, florets extra large and of the purest white. The plant is robust. Grand for pots or bedding. It is by far the best single white.

Madame Alfred Mame.—A magnificent bedding variety. The trusses are of extraordinary size, the florets by actual measurement being two and one-half inches long by two inches wide, of almost pansy form, the color is a soft sub-scarlet, lower petals shading to salmon in the center, which is deeply veined crimson. This variety has been universally admired by all who have seen it in flower. A variety that will probably never be equalled.

Mrs. E. G. Hill.—A most distinct and pleasing shade of salmon, with light shading at the center. The shading at the center is variable, however. Trusses are very large and composed of an immense number of florets.

M. Noury.—A most pleasing lavender rose color, very chaste and beautiful, with distinct marking of white at center of flower. Dwarf, and so free in bloom as to literally cover the plant.

Monsieur Poinsignon.—The color is bright aurora rose, shaded salmon, with a white eye. Large trusses of splendid-shaped flowers.

Protee.—Flowers very large and freely produced in immense trusses. Color silvery-lilac, white shading, changing to silvery-pink. A splendid sort.

Beauty of Richmond.—Intense orange scarlet, very dazzling, with large white eye, flower perfectly circular and of immense size; foliage lightly zoned. A seedling from Beauty of Kent, extremely fine.

Benjamin Schroder.—Light green foliage that is very bright in color; flower extremely large, of soft rosy pink color like that of Mary Hill, with distinct white blotch on the upper petals, of satiny texture; petals slightly recurving.

Bill Nye.—Color peach, shading to pale salmon, flower of fine size and form; a splendid grower of nice compact habit.

Gettysburg.—Bright crimson maroon of beautiful shade; flower very large and of fine form. An extra beautiful dark variety.

John Good.—Truss of enormous size and quite globular in form; stems long and rigid; a grand improvement on Lady Roseberry, color being clear salmon, lightly edged with white.

One of the finest novelties of the year. Extra profuse in bloom.

We here offer four of the choicest new kinds of these, the most beautiful of all Geraniums. Price, 30 cents each; or the four varieties for \$1.00. You cannot buy these charming varieties as cheaply elsewhere.

Mrs. Robert Sandiford.—(*The New Double White.*) This charming variety can not be excelled in its beauty by any flower we grow. The flowers are three inches across, of the purest snow-white, and perfectly double, and very free in bloom. You can not imagine anything prettier.

Madame Thibaut.—(*The New Double Pink.*) The Queen of Pelargoniums. Flowers three inches in diameter, perfectly double, of the brightest, purest pink, beautifully ruffled edges. Very free in bloom.

New Ever-Blooming Pelargonium, Freddie Dorner.—We consider this to be one of the most desirable house plants grown. It is a perpetual-blooming variety, usually commencing to bloom in December or January, and continuing throughout the Spring and Summer. We have always been unable to supply the demand, but now have a fine stock of plants

DOUBLE GERANIUMS.

SOME people do not admire Single Geraniums, while others do not fancy the Double sorts, but our collection of both varieties of this most useful family of bedding and pot plants is large and complete.

SPECIAL OFFER:
Sixteen Geraniums, your selection from this list, for \$1. Our selection, twenty for \$1.

GLOIRE DE FRANCE.

Gloire de France.—Large round florets, of waxy appearance, colors carmine and white, with carmine center, each petal delicately tinged with carmine. An excellent pot variety, to which its habit is finely suited. It is one of the prettiest Geraniums we have. This is the most beautiful of all parti-colored Geraniums which appear so bewitching to the eye. The very brightest color imaginable.

New Geranium, Bruant.—Semi-double. This magnificent Geranium is the product of Monsieur Bruanti, of Poitiers, and is the beginning of a new and distinct habited section in the Zonal Geraniums. It is very difficult to describe the difference between this type and the ordinary Zonal Geranium, but the characteristics of this variety are observed at a glance when placed beside older varieties of the same family. The leafage is round and nicely zoned, having a greater texture and substance than even the most vigorous of the old type. Color of the flower a light vermilion-red of a most pleasing shade. The flowers are absolutely perfect in shape, contour and make-up, trusses exceptionally large, and born in immense spherical balls, often measuring eight inches in diameter. It does finely in the open ground, and is perfectly reliable as a bedding Geranium of the highest merit. It makes a compact, dense growth, and has all the qualities that go to make the perfect bedder that it is. Fine also in pots. The very finest scarlet bedder extant.

White Wings.—In White Wings we have the finest double white Geranium ever introduced; and, unlike other double white Geraniums, it is suitable for bedding and flowers as profusely as the best single varieties. It is a dwarf, compact growing variety, with handsome banded foliage of a light and healthy green. The perfect double flowers are unsurpassed for cut flowers. They are borne in large trusses and are spotless snowy-white, retaining their pure whiteness even in the heat of Summer.

Fire Brand.—Color dazzling flame scarlet, fine, prominent truss, flowers large and of great substance, an excellent bedder and pot plant. For planting in masses we have seen none to equal it. Another thing in its favor, it takes fewer plants from its sturdy branching habit to give effect.

White Swan.—In White Swan we have one of the finest double white Geraniums ever introduced, and, unlike other double white Geraniums, it is suitable for bedding, and flowers as profusely as the best single varieties. It is a dwarf, compact-growing variety, with handsome, banded foliage of a light, healthy green. The perfect double flowers are unsurpassed for cut flowers. They are borne in large trusses, and are spotless, snowy-white, retaining their pure whiteness even in the heat of Summer. In the Fall the plants can be taken in the house, where they will again bloom profusely. One hundred and four trusses and buds have been counted upon a single exhibition plant. The White Swan will astonish all who grow it.

Centaur.—The new mammoth Centaur Double Geranium is the best large-flowering double pink Geranium in cultivation. Any one seeing a specimen truss cannot fail to become enthusiastic over it, pronouncing it the largest and finest Geranium in cultivation. The new Centaur is remarkable for its stout, robust growth, and for its immense trusses of bloom.

Madame Hoste.—Umbels large and borne well above the foliage; flowers of enormous size; color flesh, lined and shaded with bright salmon. One of the very finest in the collection. Shading suitably exquisite.

Clara Kisker.—Large trusses of well-expanded flowers of a bright scarlet, toned and flamed with a rosy salmon, and a flower of most expressive appearance and one that will be much admired by all.

DOUBLE GERANIUMS -- Continued.

Emile de Girardin.—No one who has not seen this lovely pink Geranium as it is grown in the beds and borders of Northern parks can imagine the beauty that lies in a flower of that color. Of a deep, soft rose rather than pink, but fresh and bright, the blossoms are perfect in form and borne well and clear above the foliage. The long beds of it seen in the Chicago parks, with their edgings of "Golden Bedder" Coleus, formed the most beautiful Geranium planting we have ever seen, and the combination is delightful. It stands the sun perfectly, and is, in our opinion, the finest double variety of any color for massing, when a delicate and artistic effect is desired.

Auratum. (*The Gold-Banded Lily of Japan.*)—This is the highest type of flowering bulbous plants. The most beautiful and fragrant of all our list. There is a wonderful beauty in the growth of this gorgeous

flower: first the dry scaly bulb, then the sturdy stalk pushing through the earth, next the deep green leaves and the flower buds, and finally the dazzling white and gold blossom. This noble Lily, when first introduced into this country, but a score of years since, sold at five dollars each, now can be had for a trifle. The new bulbs are brought from Japan for us each year, and only such will give good results. They are shipped to us wrapped in a ball of clay, and arrive plump and sound. bels of sky-blue flowers. The older the bulb gets the more beauty it displays. Price for fine bulbs, 25c. each.

New Hardy Spider Lily.

A Spider Lily which can be planted out in gardens all over the North, like a Peony and prove equally hardy is a novelty indeed, and a most valuable and welcome one. Such a species we have discovered, and it is now possible to have a clump of these elegant and charming flowers in the yard with no trouble after once setting them out. They bear an abundance of white flowers equally as beautiful and fragrant as the other species. The beauty of a clump of them established in a yard is better imagined than described. Bulbs should be set about twelve inches deep, and they will be better for protection. 20c. each; two for 35c.

SPIDER LILY.

COLLECTION OF LILIES--Continued.

Hyacinthus Candicans.—This is not unlike our Spring blooming Hyacinths. Its leaves are deep green and fleshy. The flowers are white, in handsome pendulous bells, arranged on pyramidal spikes, often reaching to the height of three feet or more in strong plants. A strong bulb will give from two to three flower spikes, and these produce from thirty to fifty flowers. The plants come into bloom in July, and bloom continuously until October. It is perfectly hardy. **20 cents each; three for 50 cents.**

Lily of the Valley.—The Lily of the Valley is one of those delicate, sweet little flowers that not only easily win our love, but keep it forever. Put four or five or half a dozen of the pips or bulbs in a pot, and in about four or five weeks they will flower. In the Spring transfer them to the garden. **Fine pips, 4 cents each; 40 cents per doz.**

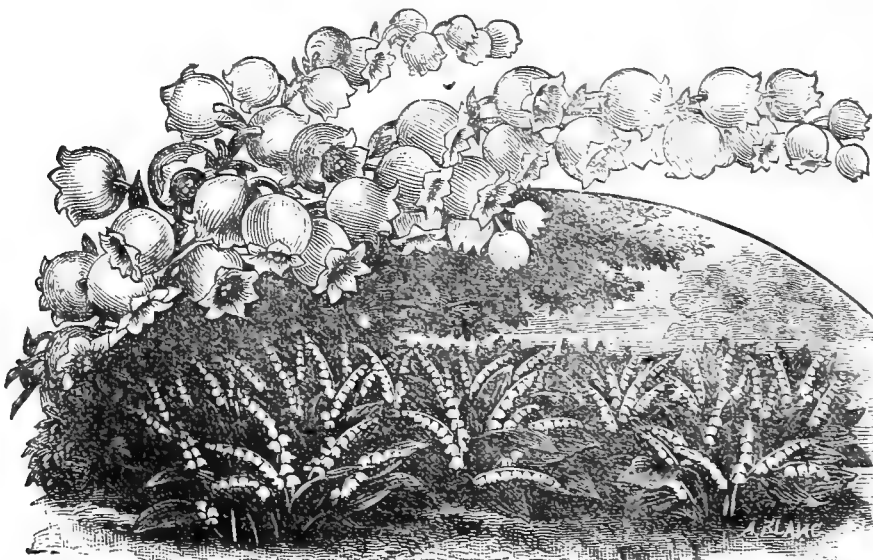

The Black Calla.—The introducer says: "Its flowers are enormous, fully a foot in length. Color clear coal black, so intense that it really shows a brilliancy, and, as well may be imagined, it is a flower of the most striking oddity and beauty. The bulbs are large and should be potted in the Fall and when growth commences set in a window."

After blooming the foliage will die down, and the bulb should be kept dry for planting again in the Fall. It is a native of the Holy Land. Treat same as for White Calla Lily." This is a very beautiful Lily. We have flowered it extensively. It is coal black and is a great curiosity. It is very scarce. **Large flowering bulbs, 50 cents each.**

New Dwarf Ever-blooming Calla Lily.—It is our good fortune to have come into possession of this most valuable of all Callas. The following facts will convince any one of its great superiority over the older sort: It is of dwarf habit and does not grow tall and scraggy like the old variety, but is compact, with a great abundance of lustrous, dark green foliage. It is a true ever-bloomer, its flowers appearing in great abundance both Summer and Winter when grown in pots, or it will bloom profusely all Summer long in the open ground, and being potted in September will continue blooming without intermission all

Winter. The same plant will grow and bloom for years without once ceasing, and the quantity of bloom which a good plant will produce is astonishing. It is estimated that six plants of the old sort will not produce so many flowers in the course of a year as will one plant of this new dwarf variety. A large plant is hardly ever without one or more flowers, and its dwarf, compact habit makes a much more desirable pot plant than the old variety. Its flowers are large size and snow white in color. All in all it is one of the most desirable plants we ever offered. **Bulbs of blooming size, 50 cents each; extra large size, 75 cents each.**

Calla Ethiopica.—(*Egyptian Lily*) This is the well-known Egyptian Lily, or Lily of the Nile, with large white flowers, broad foliage, and it will prosper under very adverse circumstances. If you want large Callas send to us, as we are headquarters for them. We have three sizes: **Small plants, to bloom next Winter, 10c each; strong blooming bulbs, 25c each; extra strong bulbs that will produce a half dozen blooms, 50c each.**

Color clear, bright, rosy-red, verging to deep, rich crimson. With these changes it adds the delightful fragrance of the old June Roses. 20 cents each.

PRINCESS BEATRICE.

CHAMPION OF THE WORLD.

"Champion of the World."—You will miss a beauty should you fail to get it. This is in all-round good qualities the greatest ever-blooming Rose in cultivation, especially for Winter blooming. It is the champion bloomer. It commences to bloom as soon as potted from the propagating bench, and continues in the greatest profusion all the time, both Summer and Winter. It is truly a perpetual bloomer, never without flowers. Champion in hardiness. 20 cents each.

Carmine Mermet, Waban.—In foliage and vigor it resembles its parent. Flowers borne on long stems, in form somewhat larger and exceeding in size and number of its petals. Color carmine pink, shaded brilliantly on the outside petals, color increasing in intensity toward the end of petal, and approaching the center of the bud each petal increases in intensity of color. Reflex petals more delicate in color, but shaded stronger at the end of the petal. 15 cents each.

White Mermet, or the Bride.—The best pure ivory-white Tea Rose. The bloom is not finer than Niphetos, for that is impossible; but it is a stronger grower, and will thrive where Niphetos will not do so well. Save in color it is identical with Catherine Mermet, from which it is a "sport." The buds, which are of a grand size, are carried high and erect on bright, smooth stems. It "pinks" in the bright, hot weather of mid-summer when planted out doors. 15 cents each.

Star of Gold.—The is the best all round deep, golden-yellow Tea Rose that is grown. The buds are very large and shapely, while the flower is double to the center, and is a deeper golden-yellow than Marechal Neil. Don't fail to try it. 15 cents each.

Catherine Mermet.—Light pink. This is one of the finest Roses grown. Its buds are inimitable, faultless in form, and charming in their every shade of color, from the purest silvery-rose to the exquisite combining of yellow and rose which illumines the base of the petals. The color is a delicate rosy-pink unapproached by any other. The buds are large, long and pointed, and of great substance and most delicious fragrance. You should not fail to have a Mermet in your collection. 10 cents each.

Yellow Mermet, or Mrs. James Wilson.—Similar in shape to Catherine Mermet. Pale yellow, tipped with rose pink. A strong and vigorous grower, and will prove to be valuable. All who know that old favorite, Catherine Mermet, will be pleased with this Rose, as it is one of the most beautiful Roses we grow. 15 cents each.

Deep Pink Mermet, or Bridesmaid.—Here we have a new Rose, a sport from that old standby, Catherine Mermet. This new variety retains all the good qualities of the parent, besides adding charms not possessed by the sweet Catherine. All know that Catherine Mermet takes precedence as a pink Rose. More plants of it are cultivated by the amateur, and more cut bloom is sold by the flower dealer of it than any pink Rose. It is about two shades deeper in color—just enough to make it bright; and it is the same color all the time under every condition of weather and surroundings. 20 cents each.

Marechal Neil.—The most popular of all Roses. There is no Rose in existence so well known as this variety. It is a deep sulphur-yellow, with buds and flowers of the largest size. With its loveliness it combines the most delicious of Tea fragrance. It is the finest yellow Rose in existence. It has a climbing habit, and where it is allowed to grow until it attains a large size, as it will in a few years, it yields thousands of beautiful golden-yellow flowers. We have this Rose in five sizes at the following prices. 10 cents, 25 cents, 50 cents, \$1.00, \$1.50 each.

Tea Rose, Comtesse de Frigneuse.—In color, charming; in freedom of bloom, second to none. The buds are long and pointed, not unlike Niphetos in form, and of good size. The color

is a deep golden-yellow, with softer shade inside of petal. As a yellow Rose this takes rank next to Marechal Neil. 15 cents each.

Star of Lyon, or Etoile de Lyon.—This magnificent Tea Rose is a rich golden-yellow, a strong, healthy and vigorous grower, immense bloomer, bearing flowers and buds early and late. The flowers are very deep, rich, and full, excellent substance, very sweet. Surely one of the very best and most beautiful yellow Tea Roses for general planting ever introduced. Remarkably hardy, both as to heat and cold, frequently standing the Winters here uninjured in open ground without protection, and blooming nicely all through the hottest part of the Summer. 15 cents each.

Mademoiselle Cecile Berthod.—Most beautiful, both in bud and flower, which is deep golden-yellow. In fact, the deepest yellow in color of any Rose we grow. The foliage is very bright. Altogether a grand Rose, and always in bloom. 20 cents each.

Papa Gontier.—A grand red Tea, of fine crimson shade and silken texture (as distinct from velvety texture). The bud is fine size and graceful form, and you would never suspect from it that the Rose is only semi-double. Extremely free, both in growth and bloom. Very long and beautifully-leaved stems can be cut, the foliage being very dark and heavy. One of the best, and a perfect bedder. 15 cents each.

Perle des Jardins, or Pearl of the Gardens.—The one Tea Rose which you positively cannot do without. It has absolutely no weak point, but is a perfect and popular Rose. The color is faultless, whether the waxy petals show the rich cream tint of cool weather, or take richer golden shades which a warmer sun gives them. The form of the bud is rich, rounded and luxuriant. It is only equaled in beauty by the open Rose, which is full to the center and large. It is no shy, creeping plant, but is fairly riotous in growth. 15 cents each.

New Tea Rose, Senator McNaughton.—This is a beautiful Rose of the Perle des Jardins type, being a sport from that well-known variety. The habit, growth, shape and size of bud are the same. The flower is identical with Perle des Jardins, differing only in color, being a pure white with decidedly golden tints. One of the most beautiful Roses grown. It will please everybody. 20 cents each.

Viscountess Folkestone.—It is unsurpassed among light colored varieties. It is graceful to the last degree, with strong, heavy foliage. The flower is delicately tinted flesh, almost white and lustrous as satin. When full blown it is like a white Paeony, but without a suggestion of stiffness. We have measured flowers of this variety six to eight inches in diameter. It is sweet-scented. 15 cents each.

Cornelia Cook.—The buds are most beautiful, of immense size, and are borne up high on massive stems, and with their round, full, heavy form, carry an air of grace and dignity quite unusual. The flowers are the clearest, snow-fest white and are arranged in the most faultless and symmetrical manner. A magnificent Rose. 10 cents each.

The Gem, or "The Fair Unknown."—This Rose is identical with Marie Van Houtte, except that it is claimed to be twice the size. Of a fine, faultless straw-yellow color, with the outer petals washed and outlined with a bright rosy-crimson. Occasionally the whole flower will be suffused with light pink. It grows vigorously, blooms freely and is most deliciously scented. In cool weather it almost changes color, taking on gorgeous crimson tints. 15 cents each.

New Crimson Rose, Princess Sagan.—The flowers of this variety are the richest crimson of any Rose in our vast collection, a single bud or blossom will catch the eye at a great distance so brilliant is the color. Indeed it is unmatched in its velvety richness, could well be termed "The Velvet Rose." It is as free in blooming as Bon Silene. 15 cents each.

Princess de Radziwell.—This elegant new ever-blooming Rose is a vigorous, strong branching grower; none of the Tea Roses approach it in this respect. It has fine formed conical buds of the largest size, being particularly noted for its long, solid bud—the buds, when properly grown, measure fully three inches in length. The Rose, when open, is very large, full and double to the center. It is very free flowering, every shoot producing a fine bud. It has the delicious Tea fragrance of the Marechal Neil that is so much admired. 15 cents each.

CORNELIA COOK.

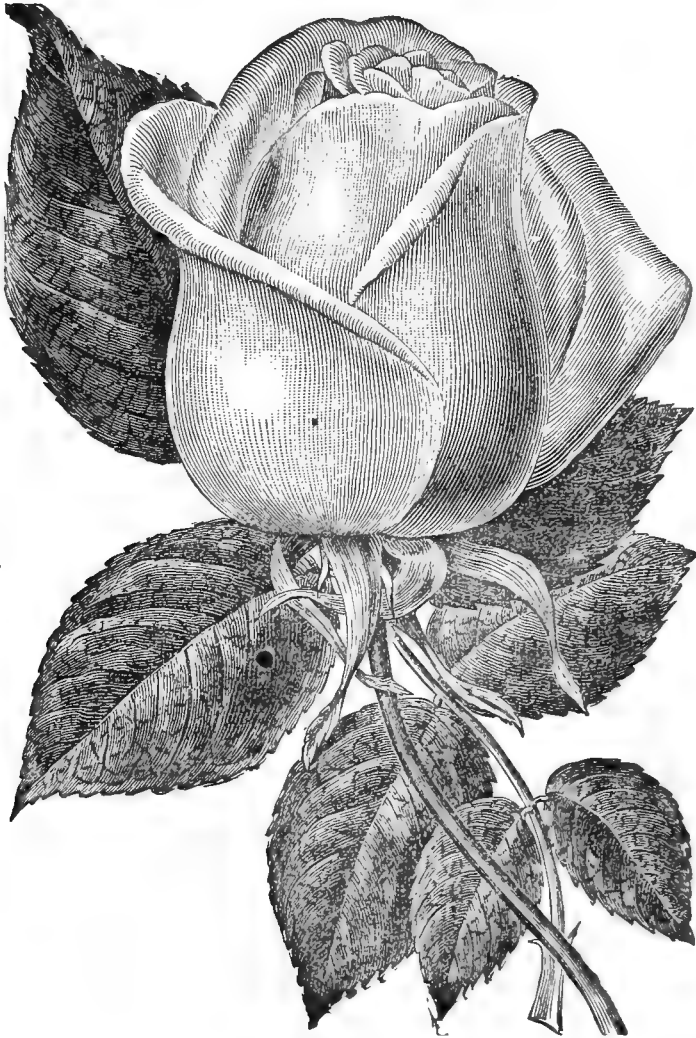

Meteor.—A velvety-red ever-bloomer of the deepest glowing crimson, as fine as a Hybrid. Flowers of medium size, very double and slightly recurving. A beautiful open Rose, a free bloomer, and a very excellent pot Rose. It has no tinge of violet or purple to mar its beauty. It is a vigorous, bushy grower, with healthy, bright foliage of the deepest green. This is unquestionably the best dark velvety-red Rose yet produced. 15 cents each.

The Premier Bedding Rose, Clothilde Soupert.—The color is a French white, deepening to a rosy-blush in the center, exceeding in distinctness of shadings the well-known Malmaison. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom, even the smallest plants being literally covered with flowers. The form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either. Valuable as it is for garden purposes, it is even more so for pot culture, and ranks as first for blooming in the dwelling house. It is entirely exempt from the diseases usually affecting Roses in the house. 15 cents each.

New Tea Rose, Mrs. W. C. Whitney.—Another remarkable Rose of American origin. It has created quite an interest among florists, being planted largely for its many good qualities; the buds are fine, large and tapering, of excellent form and substance, extra large, well filled flowers, opening nicely; color rich silvery pink, delicately shaded with fine rosy blush. 20 cents each.

METEOR

GEN. ROBT. E. LEE.

Gen. Robt. E. Lee.—One of the Latest and Best New Tea Roses. Introducer's description: This is the first Rose we have introduced, and we are sure it will please all who try it. It is in color an orange-yellow, after the color of Ma Capucine, only richer and better. It is a good grower, has elegant, long buds, borne on long stems, and will produce more buds than any Rose we know of. It forces easily, being at its best in mid-winter. There is no variety that will compare with it in all the qualities that go to make up the ideal Rose. The color is so peculiar and rich that it attracts attention wherever seen. Try it. 25 cents each.

New Tea Rose, Letty Coles.—In this we have one of the best Roses grown. Extra large, globular form, very double, exceedingly sweet Tea fragrance. Color a soft, rosy pink, shaded with intense crimson. Very chaste and beautiful. 15 cents each.

Madame Falcot.—Color apricot-yellow. An old Rose, not superseded by a better variety of its color. Flowers of medium size and fullness, but very beautiful in bud, and of the easiest culture. 10 cents each.

New Tea Rose, Countess Eva Starhemberg.—The bud is long in form, opening into a fine double flower of great beauty and heavy texture. Color is a creamy-yellow, shading to ochre at the center, borders of the petals touched with rose. Received gold medal and numerous certificates of merit. Of fine, free-growing habit. 15 cents each.

Madame Cusin.—Rosy carmine, base of the petals and center of the flower almost white, very distinct and robust. Charming. 10 cents each.

Sappho.—Buds fawn color, suffused with rose, opening flowers shaded yellow and tawny buff, centers a deep bright yellow, large, full, and globular. It produces blooms with extraordinary profusion, even for a Tea Rose. The petals are large and of much substance. A splendid Rose to keep after being cut. This we commend as being one of the prettiest and sweetest Roses ever brought before the public. 15 cents each.

Niphetos.—This still holds the lead as being the most elegant white Rose. The buds are three inches long. It is positively startling in size and purity, and is always scarce. 15 cents each.

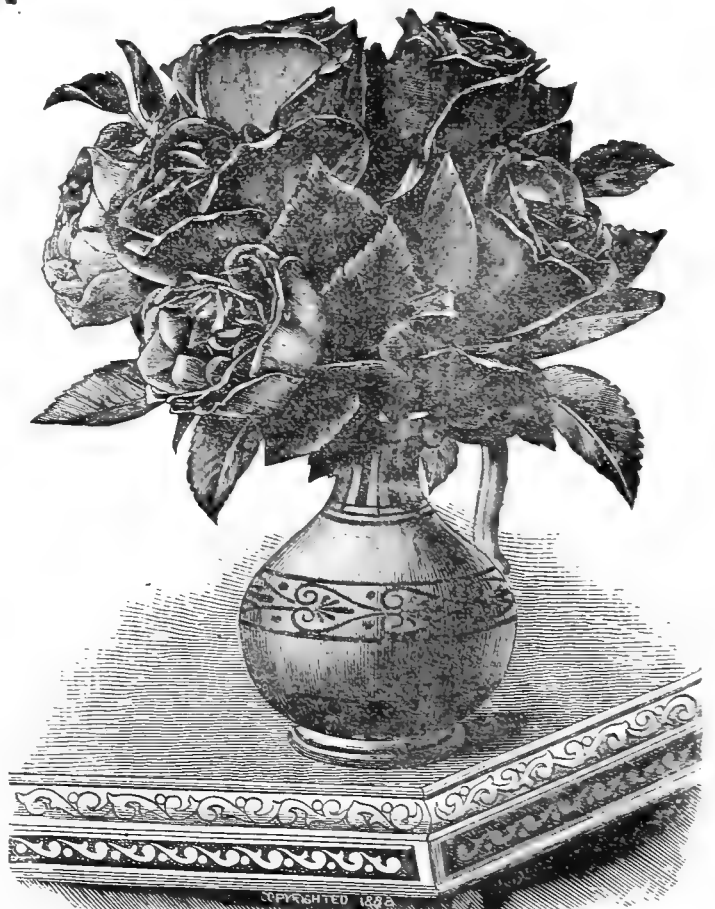

New Tea Rose, Dr. Grill.—Coppery-yellow, with fawny-rose reflex. An entirely new color and one of great brilliance. The outer petals are large, round and shell shaped, and inclose a mass of shorter petals, which are of a very brilliant color. 15 cents each.

New Crimson Tea Rose, Marion Dingee.—This grand new Rose was raised from seed of the beautiful Countess de Casserta, crossed with Duchess of Edinburg. The Casserta blood is shown most in its foliage and habit of growth, while the flowers have much of the brilliant coloring and somewhat the form of Duchess of Edinburg, but are altogether different and much more striking. It is a strong, vigorous grower, making a handsome, graceful bush, with large, thick deep green leaves. The flowers are large, beautifully cup-shaped, moderately full, and borne in wonderful profusion all through the growing season. It is a deep, brilliant crimson, one of the darkest, if not the very darkest, and richest colored Tea Roses in existence.

Duchess of Edinburg.—A splendid rose, producing very large buds of the most intense deep crimson. It flowers freely and is very vigorous. 10 cents each.

Queen's Scarlet.—This is without doubt the very best of all red Roses for bedding. It can be planted anywhere, being entirely hardy. The flowers are of large size and of a fiery-scarlet, a color seldom seen in Roses, indeed a bed of this Rose produces a mass of red equal to a bed of Geraniums. It is planted everywhere on account of its color and freedom of bloom. 10 cents each.

Grace Darling.—One of the most elegant Roses ever our pleasure to be hold. Strong, vigorous grower. Color porcelain rose, elegantly shaded with vinous crimson, a decided color, but never quite obscuring the ground of beautiful yellow upon which it rests. The colors seem to stand out separate and distinct. Very sweet. 15 cents each.

HARDY ROSES--HYBRID PERPETUALS.

SOME OF THE NEW
AND SCARCE SORTS.

These Roses are the best adapted for outdoor planting for perpetual effect. There is a grandeur about them approached by no other class of Roses. Don't become impatient if your plantings of these do not bloom the first season. Give them a chance to become established. These Roses are especially suited to plant in all the Northern States and Territories; also in the colder parts of the States of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, Kansas, etc.

New Hardy Rose, Oscar II. King of Sweden.—This is by far the richest Rose yet introduced. It is so intense in color that the exclamation on seeing it is: "Oh, what lovely black Rose!" It is very velvety in texture. A most superb Rose, and one that will always be found in the standard lists of Roses, as it has come to stay. You should try it. 20 cents each.

Hardy Rose, Anna de Diesbach. (*Glory of Paris*.) Brilliant crimson, sometimes shaded with bright maroon, long, pointed buds, and large, finely-formed, compact flowers, very full and sweet. One of the best. 15 cents each.

Received four medals and was illustrated in the *Journal des Roses*. This is the finest Hybrid of recent introduction. The bud is very large and full. We believe this to be the very best crimson Hybrid Rose grown. Try it. 25 cents each.

New Hardy Rose, Silver Queen.—Silvery-blush, shaded in the center with a delicate rosy-pink, very distinct, large and full of beautiful cupped form, and produced in great profusion, every shoot being crowded with a flower-bud. Foliage handsome, and habit unusually good, the flowers standing well above the foliage. 15 cents each.

New Hardy Ever-Blooming Rose, Dinsmore.—We have proved the Dinsmore to be entirely hardy, and can recommend it as being the finest garden Rose ever offered. Remember, it is entirely hardy, blooms incessantly, and is one of the most beautiful of all bedding Roses. Color dazzling scarlet-crimson. 20 cents each.

The flowers have all the beauty of Tea Roses, and are large and full and delightfully sweet. 20c. each.

New Hardy Rose, Captain Christy.—The flowers are of magnificent form, very double, and stand erect in their martial bearing. The color is a fresh, delicate pink, with deeper shading in the center of the flower, the whole flower possessing a bright, satiny appearance. A desirable variety. CYCLAMEN, OR PERSIAN VIOLET.

CYCLAMEN (PERSIAN VIOLET).

There is no more ornamental plant for greenhouses or parlor culture than the Cyclamen. The soil should be equal parts of turfy loam, leaf mold and silver sand. Put in pots three times the diameter of the bulb in October. Keep them in a cool, light place, watering lightly until growth begins. Then water freely and give plenty of light and air. On the approach of cold weather remove to a warmer situation, the parlor or greenhouse, but keep them near the light. The whole secret of growing Cyclamens to perfection is light, air and low temperature.

Cyclamen, Persicum.—The colors are usually white, tipped at the base with rosy-purple. 10 cents each.

Cyclamen, Persicum Giganteum.—This is a decided improvement over the old variety, being of a more robust habit and stronger grower. Produces flowers on short, stout stems and of immense size, often measuring, on well-grown bulbs, two inches in diameter. The foliage is also beautiful. Good bulbs, 20 cents each.

Palm, Washington Filifera, or the Thread Palm.—A beautiful Palm is one of the finest additions that can be made to any collection of plants, but the high prices of the best varieties have prevented most people from possessing one. Then, again, there are but few of the best sorts which succeed well with ordinary window culture. It is, therefore, with pleasure that we are now able to offer one of the most beautiful sorts in existence. 15c each, or four for 50c.

Latania Barbonica.—The well-known favorite Fan-Palm, beautiful in all stages of growth. 15 cents each, four for 50 cents.

The blossoms remain on the plants for weeks before falling. Has our highest commendation. Send to us and get the genuine. We can usually send them in bloom. Fine plants, 10 cents each, three for 25 cents.

ALOYSIA CITRIODORA—LEMON VERBENA.

Collection of Dwarf Ever-Blooming Cannas.

J. D. Cabos.—Strong grower, leaves lanceolate, green, strongly shaded with purple, flower stalks numerous, flowers large and round, color rich apricot with deeper shadings. Very striking.

Baron Kerowitz.—Drooping spikes of magenta-colored flowers, each flower as large as a Gladiolus, it makes a plant without a rival. The massive banana-like leaves alone would make this a valuable acquisition. Flowers over three inches long and two inches wide, suspended from its deep red, whip-like flower stalks. It is difficult to find words to express our admiration.

H. Thomayer.—A beautiful dwarf variety with strong flower stalks, of a superb orange color. This is a very distinct variety in the color of its flowers.

Alphonse Bouvier.—This is the grandest Canna, all things considered, introduced up to this time. The tips of the shoots are surmounted by immense clusters of bright crimson flowers of the very largest size, and nothing can exceed their brilliancy, a large plant in bloom sometimes having on as many as thirty or forty of these large, brilliant clusters of flowers.

Paul Marquard.—The flower is as fine as the finest orchid. It might be described as a bright salmon, with a carmine tint. The flower has a silvery luster, which glistens and lightens up with a silvery sheen, making the salmon of the flower very brilliant.

Sarah Hill.—As a pot plant for blooming both Summer and Winter, this Canna is of immense importance. The enormous panicles of flowers are borne continually, even on a plant only a foot or two in height and in small pots. We honestly believe it to be the finest of all Winter-blooming plants, and as a garden flower nothing can surpass it. Color intense, brilliant, velvety-crimson. Very dark and rich.

COLLECTION OF DWARF FRENCH CANNAS.

Madame Crozy.—The flowers of Madame Crozy are a flaming scarlet, bordered with gold, a marvelous combination of colors, having all the delicacy and loveliness of the rarest orchid. The individual flowers are five inches in diameter, and when the large size of the flowers and the large heads of bloom are taken in connection with the freedom with which it blooms, it makes one of the most attractive plants for bedding it can be possible to conceive of. Every shoot blooms, and as often as a head of bloom passes its prime another shoot pushes beyond it. As the plants are constantly throwing up shoots from the ground, they continue a mass of most gorgeous bloom.

Duchess de Mortemarte.—This is undoubtedly one of Mr. Crozy's most beautiful and distinct introductions. Of the most brilliant golden-yellow, dotted with brightest scarlet, and are the largest of all Cannas, and produced in constant succession.

OTAHEITE ORANGE.

This valuable and distinct variety of the Orange family is a dwarf, compact grower, with glossy, deep-green foliage, which has a decided odor of the orange trees of Florida, and is exceedingly floriferous, producing a wonderful profusion of pure white flowers of the most delicious fragrance, identical with the much-sought-for blooms of Southern orange groves. This unique Orange cannot be equaled as a Winter-blooming pot plant for house culture, and is of the easiest culture. Requires but little sunlight, and flowers and fruits when but twelve to fifteen inches high. As a pot plant this lovely dwarf orange is one of the most novel and beautiful that can be grown. With a couple of plants of it you can have an abundance of the far-famed delicate and fragrant orange blossoms. We have grown a large stock of clean, vigorous plants that will bloom and fruit at once of this beautiful Orange, and commend it to our friends as a novelty of sterling worth and merit. **Good plants, 10 cents each; large, strong plants, to bloom and bear profusely at once, 25 to 40 cents each, according to size.**

It has larger and finer blooms than any other sort. The fruit is orange-red, about the size of a Mandarin Orange, and makes an excellent marmalade; and the juice, like that of a lemon, affords a refreshing drink. It is a dwarf plant, forming a beautiful shrub from four to twelve feet high. And the magnificent appearance on a lawn of such a plant in full bloom, or weighed down by its brilliant and no less ornamental fruits, we leave to the imagination. **20 cents each; large trees by express only—five to six feet high—50 cents each, or three for \$1 00.**
